

Kingstown Furniture Limited

Environmental Action Plan

In conjunction with our Environmental Policy we will endeavour to maintain all existing systems and, wherever possible, continue to reduce our impact on the environment through short, medium and long term aims by: -

1. Constantly monitoring and reviewing our energy usage.
2. Replacing 'end of life' machinery with low energy alternatives as available.
3. Convert more records to Document Image Processing (DIP) and thus in time reduce the volume of paper required.
4. Develop our existing program of replacing our fleet vehicles with the latest Euro 3 / 4 / 5 engine design, as legislation requires at that time.
5. All replaced vehicles have, or will have acceleration-restricted engine management systems to reduce fuel consumption and reduce carbon emissions.
6. Monitor tonnage of recycled waste against tonnage of landfill waste to achieve Gold Standard Award from the National Recycling Stars scheme run by letsrecycle.com in conjunction with Shanks Waste Solutions. Bronze Award already achieved.
7. Investigate the implications and advantages of implementing an Environmental Management System over and above our existing systems to achieve ISO 18001 accreditation.
8. Share our achievements in terms of reducing landfill by demonstration and presentation with other local companies through Yorkshire Forward during 2009.
